The Best-in-Class Insulation Solution for...

- Indoor Comfort
- Energy Efficiency
- Energy Cost Savings
- Indoor Air Quality
- Eliminating Hot and Cold Spots

LOCK IN ENERGY SAVINGS FOR LIFE

Spray Polyurethane Foam Insulation

Energy Savings for Life

Spray Polyurethane Foam

True Comfort & Energy Efficiency

What really makes a house a home is how comfortable it feels to you and your family. Imagine living in a home where the temperature remains consistent...no hot or cold spots. Homes insulated with FOAM-LOK[®] spray foam are just simply more comfortable because you control the environment within. And along with the benefits of comfort, you will also enjoy: noise reduction, better air quality, and reduced energy consumption. All of this adds up to a more comfortable, efficient home for you and your family.

The Department of Energy reports that heating and cooling accounts for approximately 56% of the energy used in the typical home.

WHY SPRAY POLYURETHANE FOAM INSULATION?

Spray foam is a lightweight, durable, and versatile insulation solution boasting the industry's strongest performance in energy efficiency and energy cost savings. This insulation is the optimal solution for all residential designs.

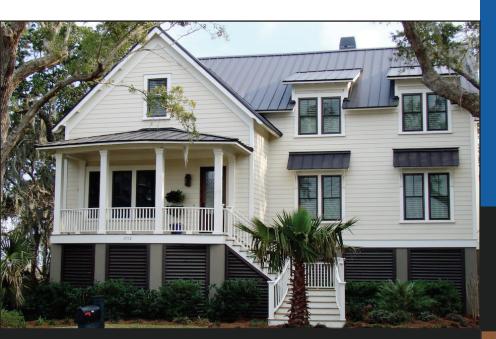

- Fully adheres effectively to most construction substrates
- Professionally installed
- Best insulation for all climate zones
- Contributes to the wellness of occupants
- Lasts the life of the structure

"High performance home construction requires the best insulation to create the greatest value for homeowners. I have Lapolla FOAM-LOK spray foam insulation in my home to ensure better air quality and energy savings. Lapolla is my choice in high performance insulation."

YOUR OPTIMAL SOLUTION FOR...

- Up to 45% energy savings for the life of your home
- Improved air quality
- Reducing the infiltration of pollutants, allergens, and other harmful asthma triggers from entering your home
- Enhancing comfort and wellness
- Minimizing unwanted exterior noise
- Eliminating hot and cold spots
- Consistent comfort throughout your home
- Air and moisture control to prevent the formation of harmful mold and mildew

FOAM-LOK 2000-4G is the first spray polyurethane foam insulation worldwide to eliminate ozone depletion and reduce global warming impact.

FOAM-LOK 2000-4G SUSTAINABILITY IN FOCUS

- A meaningful amount of post-consumer recycled content utilizing over 3,000 water bottles in every home
- Reduced Global Warming Impact
- No ozone depletion
- By properly sealing your home's envelope you reduce the amount of fossil fuels needed to produce electricity, thereby reducing your carbon footprint

Spray foam effectively seals the building envelope, filling in any cracks and crevices, the common source of air and moisture infiltration as well as temperature variations.

FOAM-LOK spray foam insulation works by sealing the building envelope to stop conditioned air from escaping and prevent unwanted outside air from entering your home. FOAM-LOK is a fully adhered insulation that is spray applied into wall cavities providing a continuous air and moisture barrier. Spray foam allows efficient use of your HVAC system and helps regulate the temperature fluctuations and humidity in your home.

Two Types of Spray Foam:

- Open Cell Performance upgrade over traditional insulation, providing a fully adhered air barrier
- Closed Cell Premium spray foam offers the highest insulation performance, air and moisture barrier, and added structural integrity
